# Ministry of Education and Science – Feros Application

**Client:** Ministry of Education and Science

**Country:** Republic of Macedonia

**Industry:** Government

**Business challenge:** The objective of the project was to develop user-friendly, modular and scalable web based solution, which will provide online submission of student requests for state dormitories, for scholarship and student loans.

**Solution:** Feros Application

**Seavus** developed an application with the focus on the content, which is put on the process for student lodging at state dormitories, but also on the processes for the other benefits. Instead of manually submitting requests for lodging at the state owned dormitories, this web application will help students to save time and reduce the administrative cost both for the Ministry of Education and Science and the students.

Some of the functionalities supported in the System are: Form manager (creating, editing, archiving, reusing and

## **Benefits:**

Electronic evaluation of submitted application.

Transparent distribution of apartments and automated generation of winners list.

Influence of human factor is decreased to minimum.

Faster process for applying for dormitories, for scholarship and student loans.

deleting), Criteria manager (creating, editing, archiving, reusing and deleting), Dynamical building of application for submission for dormitory, scholarships and student loans (creating, editing, archiving, publishing, reusing and deleting), Confirmation and verification of application, Reporting and filter-tool for creating custom reports, etc.

***Technologies utilized:*** The system was developed on the Microsoft .NET Framework 2.0 with ASP.NET technology, utilizing Web Forms and XML Web Services. For data storage, the system uses Microsoft SQL Server 2000.
